# Saniton

*Trusted homegrown brand in sanitary ware.*

Saniton has been a cornerstone of Singapore's sanitary ware industry for over 35 years, renowned for its high-quality, durable, and well-designed products. With innovative in-house design and strong production capabilities, our sanitary wares are used extensively in the residential, commercial, institutional, healthcare, and industrial sectors, earning a reputation for quality and reliability.

While continuing to serve businesses, the company has expanded in 2020 to offer consumers eco-friendly and water-efficient sanitary wares that are coupled with more advanced features. Our products are also marketed beyond Singapore's shores, establishing an international presence for a trusted Singapore brand.

With a legacy of craftsmanship and a commitment to quality, Saniton strives to provide superior sanitary solutions to all users. Our products are thoughtfully crafted with a focus on design, durability, using only the best materials to ensure they withstand the test of time. This commitment to excellence has been at the heart of our operations since day one. Today, Saniton continues to uphold these principles, combining them with modern advancements to meet the evolving needs of our customers.

# The story of Saniton

1989

## Company Incorporation

Saniton Pottery Pte Ltd was officially incorporated, marking the commencement of our journey in the sanitary ware industry.

1990

## First Product Launch

We introduced our inaugural toilet bowl model, Thunia ST2088, establishing a benchmark for innovation and quality in our product line. This model became hugely popular and well-loved by many Singaporeans in the 90s due to its strong and reliable flushing performance.

2008

## Eco - Friendly Water Closets

Saniton collaborated with the Housing and Development Board to introduce eco-friendly water closets that re-use and recycle water, increasing water efficiency and enhancing our sustainability efforts.

2015

## Production Milestone

Saniton produced our first 1 million water closets since inauguration, moving towards our goal of bringing modern day bathroom comforts to every home in Singapore.

2020

## Rebranding and Technological Advancements

Saniton rebranded in 2020 with the introduction of several cutting-edge technologies, including the new Whirlpool Flush and Anti-Bacterial Technology. These innovations coupled with improved modernized designs reinforced our outlook as a traditional business with global aspirations.

1996

#### BCA Registration Upgrade

Saniton achieved an L4 grade registration with the Building and Construction Authority (BCA), enabling us to participate in public sector construction tenders with project values up to \$8.0 million. This milestone demonstrated our growing capabilities and reliability in the industry.

1997

#### Industry Recognition

Saniton was honored with a Medal of Appreciation from the Housing Development Board of Singapore, recognizing our contributions and commitment to excellence in Singapore's public housing landscape.

2002

#### Innovation in Urinals

In a new partnership with Falcon Water Technologies, a Los Angeles based company, Saniton introduced the first waterless urinal to the Singapore market, demonstrating our commitment to water conservation and innovative sanitation solutions.

1999

#### Expansion and Rebranding

We expanded our operations by opening a new production facility in Pasir Gudang, Malaysia. Concurrently, we renamed to Saniton Ceramic to reflect our broader manufacturing capabilities.

2024

#### Celebrating 35 years of Homegrown Excellence

In 2024, Saniton proudly celebrates our 35 Years of Homegrown Excellence. We are committed to continuing our pursuit of developing quality products that are sustainable and well-loved by all current and future generations of Singaporeans.

# TECHNOLOGIES

## ANTI-BACTERIAL GLAZE

A protective glaze that is fired into the ceramic ware to prevent bacterial growth and reduce microbial activity.

Tested to JIS Z 2801/ISO 22196 standards, > 99% of bacteria are killed upon contact with our wares.

## BUILT TO LAST, DESIGNED TO PROTECT

### TOUCHLESS FLUSH

A high performance germ-free, touch-free water closet now allows you to flush with just a wave of your hand.

### RIMLESS DESIGN

Our Rimless design ensures easy cleaning, improving hygiene and saving time.

### WHIRLPOOL FLUSH

The new Whirlpool Flush cleans the entire bowl in one flush, preventing bacteria and germs from accumulating.

### ANTI-BACTERIAL SEAT AND COVER

Our soft-closing UF seat and cover are coated with anti-bacterial protection too, ensuring comfort with improved hygiene.

# TOUCHLESS FLUSH TECHNOLOGY

## Flush with a Wave: Hygienic & Hassle-Free

Enjoy a germ-free, hygienic experience with Saniton's Touchless Flush technology — activated with just a wave of your hand. Ideal for both homes and shared spaces like offices, this system is especially convenient for children and the elderly, eliminating the need to press flush buttons.

 Sensor Mode

 Quiet Dual Flush

 Manual Bypass

 Battery Power  
AA Alkaline x 4

### Features

- Dual flushing for higher water-saving efficiency
- Quiet flushing ensures minimal disturbance to the surrounding
- Powered by AA alkaline battery
- Come with manual bypass, backup when power off
- MWELS 3 Ticks

# WATERLESS URINALS

# DISCOVER WATERLESS URINAL

Saniton's water-free urinals use the robust High-Performance Key Valve (HPKV) cartridge for maximum water savings, hygiene, and odor control. No flushing needed.

The **Key-Ring** dissolves with use, providing a visual signal when your cartridge needs to be changed, making maintenance easier.

Reduce over 260 kg of CO<sub>2</sub> emissions and save up to 40,000 gallons of fresh water per urinal annually.

## HYGIENIC

Touch-free, anti-bacterial, and easy to clean—ideal for sanitary restrooms.

## ODOUR CONTROL

This ensures a fresher restroom environment than flush urinals, which may trap odors from stagnant water.

## LOW MAINTENANCE

Sleek, low-maintenance design with fewer moving parts, reducing repair costs and saving time for facility managers.

## COST SAVING

Reduce water bills and maintenance costs with waterless urinals. No flushing, lower upkeep, and long-term savings.

Tested in Singapore Laboratory Services and certified with WELS Certification of 3 ticks (VVV) for zero water consumption.
